

The Cat

By: Charles Kanoy

Curious is an interesting emotion,
Understanding things for simply the notion.
Right when you think you know one thing, something else
Is standing and waiting for you to come and help
Open your and other people's minds.
So it has happened over and over throughout time.
I, and others, love to learn all sorts of new things
Things like how does a network send out pings.
You can continue to learn even as you grow old.

Kaleidoscopes of color waiting to be sold.
I'd love to know how they work.
Learning new things has all kinds of different perks
Like telling people what happens in space,
Even how to read at an above average pace!
Don't let anyone tell you you can't learn

They don't understand what it's like to earn
Heavily desired brain power.
Everyone knows about that tower.

Could be that they are scared of the brain?
Absolutely, so they focus their moves on the train
That everyone runs on only to be drained.
